	Followin	ng is a listing of Polish ve	ssels with armamen	t as indicated: 50X1
			ssels with armamen	t as indicated: 50x1
	Blyskewi	Loa: (Destroyer)		t as indicated:
	Slyskawi Four mai antiairo	Loa: (Destroyer) In recoil guns, 120mm capableraft guns. These guns are	e of firing at 70° fired electrically	t as indicated:
	Slyskawi Four mai antiaire Two moun	in recoil guns, 120mm capable raft guns. These guns are note for 12 caliber "Bofars".	e of firing at 70° fired electrically	t as indicated:
	Slyskawi Four mai antiaire Two moun	in recoil guns, 120mm capable raft guns. These guns are nots for 12 caliber "Bofars".	e of firing at 70° fired electrically	angle and can be used as
	Four mai antiaire Two moun Four mou	in recoil guns, 120mm capableraft guns. These guns are noted for 12 caliber "Bofars".  ints for "Orlikons".  repedo tubes - recoil type equations	e of firing at 70° fired electrically uipped with British	angle and can be used as
	Four mai antiaire Two moun Four mou	in recoil guns, 120mm capable raft guns. These guns are nots for 12 caliber "Bofars".	e of firing at 70° fired electrically uipped with British side of the ship	angle and can be used as
	Four mai antiaire Two moun Four mou Four tor Four spe	in recoil guns, 120mm capable raft guns. These guns are nots for 12 caliber "Bofars". unts for "Orlikons". The secoil type equical catapults, two on each	e of firing at 70° fired electrically uipped with British side of the ship	angle and can be used as
	Four mai antiaire Two moun Four mou Four tor Four spe Smoke ge	in recoil guns, 120mm capableraft guns. These guns are nots for 12 caliber "Bofars".  Ints for "Orlikons".  Pedo tubes - recoil type equital catapults, two on each guerators for laying smoke submarine)  105 mm gun which was excha	e of firing at 70° fired electrically uipped with British side of the ship increens.	angle and can be used as type 400 mm torpedoes.
	Blyskawi Four mai antiairo Two moun Four mou Four tor Four spe Smoke ge SEP: (S One main same cal	in recoil guns, 120mm capableraft guns. These guns are nots for 12 caliber "Bofars".  Ints for "Orlikons".  Pedo tubes - recoil type equital catapults, two on each guerators for laying smoke submarine)  105 mm gun which was excha	e of firing at 70° fired electrically uipped with British side of the ship increens.	angle and can be used as type 400 mm torpedoes.
	Blyskawi Four mai antiairo Two moun Four mou Four tor Four spe Smoke ge SEP: (S One main same cal	in recoil guns, 120mm capable raft guns. These guns are nots for 12 caliber "Bofars". Ints for "Orlikons". Spedo tubes - recoil type equial catapults, two on each enerators for laying smoke stubmarine)	e of firing at 70° fired electrically uipped with British side of the ship increens.	angle and can be used as type 400 mm torpedoes.
	Four main antiairo Two moun four mou four tor four spe four specific specif	in recoil guns, 120mm capable raft guns. These guns are nots for 12 caliber "Bofars". Ints for "Orlikons". Spedo tubes - recoil type equial catapults, two on each enerators for laying smoke stubmarine)	e of firing at 70° fired electrically uipped with British side of the ship increens.	angle and can be used as type 400 mm torpedoes.
	Four main antiairo Two moun four mou four tor four spe fo	in recoil guns, 120mm capableraft guns. These guns are note for 12 caliber "Bofars". Ints for "Orlikons". The second type equical catapults, two on each merators for laying smoke submarine)  105 mm gun which was exchaliber typedo tubes	e of firing at 70° fired electrically uipped with British side of the ship increens.	angle and can be used as type 400 mm torpedoes.
	Four main antiairo Two moun four mou four tor four spe four tor four tor four tor four tor four small four tor four specific four tor four specific four tor four specific four tor four specific four tor four specific four	in recoil guns, 120mm capable praft guns. These guns are nots for 1½ caliber "Bofars". unts for "Orlikons". The predo tubes - recoil type equical catapults, two on each enerators for laying smoke submarine)  105 mm gun which was exchaliber expedo tubes  105 mm gun predo tubes	e of firing at 70° fired electrically uipped with British side of the ship screens.	angle and can be used as type 400 mm torpedoes. for releasing depth charg reapon of approximately t
	Four main antiairo Two moun four mou four tor four spe four tor four tor four tor four tor four small four tor four specific four tor four specific four tor four specific four tor four specific four tor four specific four	in recoil guns, 120mm capableraft guns. These guns are note for 12 caliber "Bofars". Ints for "Orlikons". The second type equical catapults, two on each merators for laying smoke submarine)  105 mm gun which was exchaliber typedo tubes	e of firing at 70° fired electrically uipped with British side of the ship screens.	angle and can be used as type 400 mm torpedoes. for releasing depth charg reapon of approximately t
	Four main antiairo Two moun four mou four tor four spe four tor This ves	in recoil guns, 120mm capable praft guns. These guns are nots for 1½ caliber "Bofars". unts for "Orlikons". The predo tubes - recoil type equical catapults, two on each enerators for laying smoke submarine)  105 mm gun which was exchaliber expedo tubes  105 mm gun predo tubes	e of firing at 70° fired electrically uipped with British side of the ship screens.	angle and can be used as type 400 mm torpedoes. for releasing depth charg reapon of approximately t
	Four main antiairo Two moun four mou four tor four spe four tor This ves	in recoil guns, 120mm capable raft guns. These guns are not for 12 caliber "Bofars". unts for "Orlikons". These guns are not for "Orlikons". The coil type equivalent of the catapults, two on each enerators for laying smoke submarine)  105 mm gun which was exchaliber repede tubes  105 mm gun  1 antiaircraft gun  pede tubes  sel can also be used for lay	e of firing at 70° fired electrically uipped with British side of the ship screens.	angle and can be used as type 400 mm torpedoes. For releasing depth chargesepon of approximately to
	Four main antiairo Two moun Four mou Four tor Four spe Smoke ge SEP: (S One main same cal eight to TAIK: One main One small Four tor This vest CSAJKA -	in recoil guns, 120mm capable raft guns. These guns are not for 12 caliber "Bofars". unts for "Orlikons". These guns are not for "Orlikons". The coil type equivalent of the catapults, two on each enerators for laying smoke submarine)  105 mm gun which was exchaliber repede tubes  105 mm gun  1 antiaircraft gun  pede tubes  sel can also be used for lay	e of firing at 70° fired electrically uipped with British side of the ship screens.	angle and can be used as type 400 mm torpedoes. For releasing depth chargesepon of approximately to
	Four main antiairo Two moun four mou four tor four spe four spe four spe four spe four spe four spe four same cal eight to four tor This ves CSAJKA -	in recoil guns, 120mm capable praft guns. These guns are nots for 12 caliber "Bofars". Ints for "Orlikons". These guns are not guns for "Orlikons". The second type equital catapults, two on each gunerators for laying smoke a submarine)  105 mm gun which was exchaliber typedo tubes  105 mm gun gun which was exchaliber typedo tubes  105 mm gun	e of firing at 70° fired electrically uipped with British side of the ship screens.  Inged for a Soviet was a soviet with the ship streens.	angle and can be used as type 400 mm torpedoes. For releasing depth charge reapon of approximately to the same and anchored mines 50x1
	Four main antiairo Two moun four moun four tor four spe Smoke ge SEP: (S One main same call eight to TAIK: One main one small four tor This vest CSAJKA -	in recoil guns, 120mm capable praft guns. These guns are nots for 1½ caliber "Bofars". Ints for "Orlikons". These guns are nots for "Orlikons". The equitable of the equitable o	e of firing at 70° fired electrically uipped with British side of the ship screens.  Inged for a Soviet was a soviet with the second soviet with the second soviet was a soviet with the second soviet with the second soviet was a soviet	angle and can be used as type 400 mm torpedoes. For releasing depth charg seapon of approximately to 50x1

SECRET/SECURITY INFORMATION
<b>-2-</b>
a 75 mm gun of Soviet construction which is mounted on the bow of the vessels.
The antiaircraft equipment consisted of heavy antiaircraft machine guns.
KACZORY - These are so called Poles because they resemble ganders or drakes. Each of these is equipped with a 75 mm gun and water-cooled machine guns are also capable of laying and sweeping mines.
